

4 Plate Std SINGLE ELLIPSE Tank Assembly

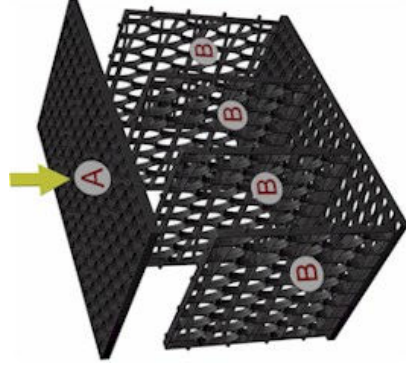

*4 Large Ellipse Plate A

*4 Small Ellipse Plate B

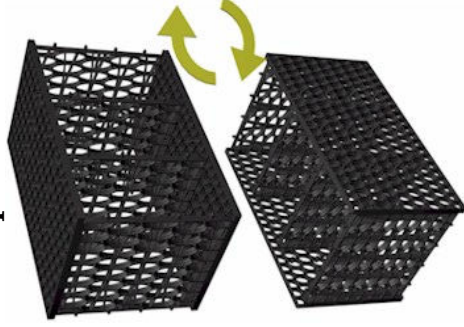

Step1:

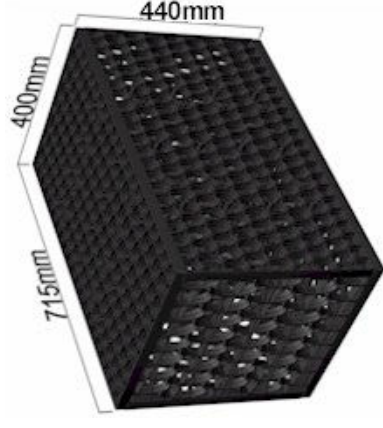

Step 2:

Step 3:

Step4:

Step 1:

Lay a Large Ellipse Plate "A" on a flat surface and insert 4 Small Ellipse plates "B" in slot 1/3/5/7 such that they all are equidistant. Make sure all small plugs are on top.

Step 2:

Align a Large Ellipse Plate "A" and lock it on top.

Step 3 & 4:

Flip the Tank Module 90 degree on its side; make sure you see all Large Plugs aligned, then position the Large Ellipse Plate "A" and lock it in with a light rubber mallet. Repeat the same procedure for other side. This will give you a complete Single Module (400mm x 715mm x 440mm)

Important Note: Please note when assembled module are placed in the excavation, 715mm & 400mm can be the length or width, visa versa. **440mm always has to be the height.** This way you will always see a complete top ellipse LARGE plate, and no frames.
